

Executive Briefing Deck Template

For sponsors presenting a proposed noemergis initiative

In plain words

Help a sponsor explain the problem, proposed workflow, value, risks, and decision needed.

This document is for sponsors presenting a proposed noemergis initiative. It is designed to help someone make a clear decision, not to create unnecessary process.

What you need

- Business problem
- Current baseline
- Proposed scope

What to do

- Frame the decision.
- Show evidence and tradeoffs.
- Ask for a clear next step.

What good looks like

- The intended outcome is written in plain language.
- One person owns the decision and the next action.
- Inputs, exclusions, and data boundaries are explicit.
- Evidence is reviewed before the work expands.

What this does not promise

This document does not guarantee a business result, replace legal or regulatory advice, or approve production use. Final scope, controls, and acceptance criteria must reflect the actual organization and workflow.

Working notes

Decision: _____

Owner: _____

Evidence: _____

Next action: _____
